

## Lesson 10 Vocabulary List

- **Animated GIF** - A series of GIF images that appear in sequence to give the illusion of movement.
- **Animation** - Special visual or sound effects that you can add to text or to an object on a slide.
- **Charts** - Provide visual statistical information and simplify complex sets of data.
- **Design templates** - Professionally designed templates that contain color schemes with custom formatting and styled fonts, all designed to create a special look.
- **Electronic presentation** - Using a presentations graphics software program to make a presentation using a projector.
- **Multimedia** - The use of text, graphics, audio, and video in combination to create an effective means of communication and interaction.
- **Plug-ins** - Small software programs designed to work with a Web browser to perform a specific function that the browser cannot do by itself.
- **Presentation graphics program** - Software used to create graphical electronic presentations; examples are Microsoft PowerPoint, Corel Presentations, and Lotus Freelance.
- **Transitions** - Special effects that display when you move from slide to slide.
